V

**REDUCE YOUR
| CARBON *FOOD*PRINT |**

Livestock production creates more greenhouse gases than all planes, cars, trucks and buses combined.

Switching to a plant-based diet reduces your individual carbon footprint by a staggering 70% [Oxford University 2016].

Our non-profit organization Friends of Fig, provides information on food and carbon footprint so we can all make a significant impact on climate change.

Ask us about our Passport program for kids 12 and under!
