METHODOLOGY

The Glengariff Group, Inc. conducted a Michigan statewide survey of November 2022 likely general election voters. The 600 sample, live operator telephone survey was conducted on January 3-7, 2022 and has a margin of error of +/-4.0% with a 95% level of confidence. 25.0% of respondents were contacted via landline telephone. 75.0% of respondents were contacted via cell phone telephone. This survey was commissioned by WDIV Local 4 News and the Detroit News.

KEY FINDINGS

Lay of the Land

- * Michigan voters sharply believe the nation is on the wrong track with 63.5% wrong track and 22.7% right track. The numbers for the national wrong track have been consistent since Summer 2021 and look similar to numbers from May 2016.

<u>Date</u>	<u>Right</u>	<u>Wrong</u>
Jan 22	22.7%	63.5%
Nov 21	22.8%	62.2%
Sept 21	25.5%	58.5%
Sept 20	31.3%	58.0%
Jan 20	35.3%	45.7%
Jan 18	33.0%	54.0%
May 16	23.8%	62.3%

- * Michigan voters believe the state is on the wrong track by a narrower number of 47.8% wrong track and 35.5% right track. The numbers represent a minor rebound from November 2021 levels, but are markedly better than how voters feel about the nation.

<u>Date</u>	<u>Right</u>	<u>Wrong</u>
Jan 22	35.5%	47.8%
Nov 21	31.7%	52.8%
Sept 21	38.7%	47.2%
Sept 20	48.7%	38.7%
Jan 20	46.2%	33.2%
Jan 18	41.0%	37.0%
May 16	34.3%	51.3%

* Respondents were asked a generic ballot question as to generally speaking whether they would support a Republican or Democratic candidate for State House.

38.3% said a Democratic candidate. 36.9% said a Republican candidate. 22.5% said it depended on the candidate. These numbers represent a statistical tossup in the generic ballot test.

The dead even nature of these numbers if further reflected among Independent voters who fall 23.8% Republican to 22.1% Democratic.

Motivation to Vote at 9.0: 2022 Similar to 2018 and 2020 Levels

* Voters were asked on a one-to-ten scale how motivated they were to vote in the November Gubernatorial Election. The higher the score, the greater the motivation to vote. Michigan voters are motivated at a strong 9.0 on a 10.0-point scale.

The chart below compares motivation to vote levels with 2012, 2014, 2016, 2020 and 2022. Voter motivation remains very high. There appears to be a slight weakening in motivation among Democratic and Independent voters from record high motivation levels of 2018 and 2020. Base Republican voters, however, appear as motivated as 2018 and 2020 levels.

But the broader takeaway on motivation levels is that 2022 will look far more like 2018 and 2020 turnout than it will 2012, 2014 or 2016's relatively lower turnout levels.

Independent Voters Driving Whitmer Shift

The improvement in Governor Whitmer’s job approval comes from a major shift in support among Independent voters.

<u>Party Affiliation</u>	<u>November 2021</u>	<u>January 2022</u>	<u>Shift in Job Approval</u>
Strong Democratic	87.2%	92.7%	+5.7%
Lean Democratic	80.0%	84.2%	+4.2%
Independent	46.0%	62.3%	+16.3%
Lean Republican	23.9%	29.9%	+6.0%
Strong Republican	9.5%	9.0%	-0.5%

The shift among independent voters has caused the dramatic improvement for Whitmer’s numbers. In September 2020, Independent disapproved of her performance by a margin of 39.2% approve to 51.2% disapprove. They now approve of her performance by a margin 62.3% approve to 27.9% disapprove. Her approval among independent voters has gone from -11% to +34.4% -- a 45-point reversal.

While Whitmer has 62.3% job approval among independent voters, Joe Biden has only 39.4% job approval among independent voters.

There is a major caveat to Whitmer’s improvement among Independent voters – and that is the strength of the approval. Only 18.0% STRONGLY APPROVE while 44.3% SOMEWHAT APPROVE of Whitmer’s performance.

The chart below compares the shift among Independent voters from September 2021 to January 2022. This shift began in our November 2021 surveying and has accelerated significantly.

<u>Level</u>	<u>Sept 2020</u>	<u>January 2022</u>	<u>Shift</u>
Strongly Approve	23.2%	18.0%	-5.3%
Somewhat Approve	16.0%	44.3%	+28.3%
Somewhat Disapprove	18.4%	7.4%	-11.0%
Strongly Disapprove	32.8%	20.5%	-12.3%

Despite Strong Job Approval, Whitmer Re-Elect Number Provides a Red Flag

- * Despite strong job approval numbers for Governor Whitmer’s performance, her re-elect numbers provide a red flag that the race could still be close.

39.9% of voters said will definitely vote to re-elect her while 41.7% said they would vote for someone new. 12.2% said it would depend on who was running against her. These are consistent with numbers from January 2020.

- * These low re-elect numbers combined with a dead-even generic ballot test indicate the ‘potential’ for a close race.

But when you look at those 12.2% that said it would depend who was running against her – they break 38.4% Whitmer to 18.4% Craig, with 27.1% undecided.

Three of Four Primary Republican Challengers Lack Name Identification.

- * Respondents were asked if they had heard of the name of four prominent announced Republican candidates for Governor. James Craig led with 44.6% name identification breaking 17.7% favorable to 9.5% unfavorable.

<u>Candidate</u>	<u>Name Identification</u>
James Craig	44.6%
Kevin Rinke	20.6%
Garrett Soldano	18.9%
Tudor Dixon	14.2%

- * While it does not represent likely GOP primary voters, we are able to look at each Republican candidate's level of name identification among key voting blocs within the GOP.

- * Gretchen Whitmer holds a 48.6%-39.1% lead over James Craig, with 11.7% of voters remaining undecided. Whitmer’s 9.5% lead is a strong advantage that puts her just shy of the crucial 50% mark. At this point, James Craig is the strongest of the four Republican contenders tested in this survey due to higher name identification.

Whitmer leads Garrett Soldano by a margin of 49.6%-33.2%, with 16.7% undecided -- a 16.4% lead.

Whitmer leads Kevin Rinke by a margin of 49.6%-33.0%, with 16.9% undecided - a 16.6% lead.
